

A POWERFUL PACKAGE

4.25 GRANDE CONTAINERS

It's a fact, nothing sells faster than Proven Winners®. And you can see why. From its distinctive color and branding to its innovative tag design and technology, it's a powerful package for growers and retailers. And for consumers, it's hard to resist because they know it means quality. To ensure that your investment in our plant material pays off, this year we are now recommending that you use our unique and high-profile 4.25 Grande™ container for small pot production and plant out in 10-count trays.

Innovative tag printing allows consumers to bend the tag down and easily read plant details right-side up without removing the tag.

Strong locking mechanism – always positioned above a logo – keeps tags with the plant, not on the floor.

Each size container has a specific UPC and custom UPCs are available.

*Guaranteed success or your money back.**

Self-Symmetric technology eliminates the need to spin containers and line up tags – just let the trays do all the work automatically.

QR Code provides variety-specific consumer information.

Strong branding message with the Proven Winners® logo appearing below the tag.

Fits perfectly in a gardener's hand, and because it is an inch taller than a 4.50 Classic™ container, garden centers can charge at least \$0.50 more.

* If the extra cost of the Proven Winners Proven Package does not help you sell our plants faster—and more profitably—we will refund you the difference (5 cents for every 1.0 GL container and 2 cents for all our other branded containers purchased).
